DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-7,11,13,14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1, Applicant states that the “wave parameter” is output “to an audio processor” (line 6) but is output “by the audio processor” (line 9). This is contradictory and correction is required.

Regarding Claims 3,11, it is not clearly set forth how one parameter can “have” two other parameters and what the relationship is. Correction is required.

Regarding Claims 4,5,13,14, it is not clearly set forth how the one parameter is “relative” to the other parameter. Correction is required.

Allowable Subject Matter

Claims 1-7,11,13,14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 8-10,12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 1-14 are allowable in terms of the prior art, as the prior art does not explicitly teach in combination a microprocessor, to output a wave parameter and a

characteristic parameter; a memory, to store a parameter look-up table of which records a modulation parameter and control parameter corresponding to the wave parameter; and an audio processor, to input the wave parameter and the characteristic parameter for reading the modulation parameter and the control parameter from the parameter look-up table based on the wave parameter and further performing frequency modulation to produce the synthetic audio based on the modulation parameter, the control parameter, and the property parameter.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited on the attached PTO-892 is considered to be art related to the present invention.
